

Build Sprint 2026

“The world forgot to call. We didn't. “

Team Name: Mech
Team Member: Vaibhav

The Problem

300 million
elderly people
live alone
worldwide

1 in 4
seniors reports
extreme loneliness

100 deaths
every hour
linked to loneliness
— WHO

Social welfare offices are critically understaffed.
A caseworker can manage 50+ elderly residents —
but there are only so many hours in a day to call.

Most at-risk seniors go days, sometimes weeks,
without a single human conversation.

"The phone never rings. And no one notices."

The Idea

What if a **caring voice** could reach every elder — every single day — without burning out a single human?

01

Schedule

Caseworker enrolls resident with name, phone, call time.

02

Calmie Calls

Warm, human-like AI voice calls at the right time, holds a natural 7-min check-in.

03

AI Listens

Claude reads the transcript, scores the mood, flags distress, alerts caseworker.

Not a chatbot. Not a form. **A real conversation — at scale.**

Key Features

Human-Like Voice

ElevenLabs Aria voice — warm, unhurried, zero robotic tone.

Fully Automated Calls

APScheduler fires daily. No human needs to remember to call.

AI Distress Detection

Claude analyzes every transcript for mood, loneliness, urgency.

Instant Escalation

Urgent flag → caseworker dashboard alert + SMS to emergency contact.

Caseworker Dashboard

Live transcripts, mood scores, flagged calls, one-click escalate.

Real Phone Calls

Twilio outbound calling — works on any landline or mobile, no app needed.

Innovation

"What makes it different?"

**Every other solution asks elderly people to come to the technology.
Calmie brings the technology to them — through a phone call.**

✗ OLD WAY

Wellness apps elderly can't use

Caseworkers manually calling 50+ residents, burning out

Generic chatbots that feel cold and robotic

Problems noticed weeks later when it's too late

✓ CALMIE

A phone call. Zero learning curve.

One worker oversees 500+ — AI does the calls, humans handle the flags.

ElevenLabs voice tuned for warmth — users don't know it's AI.

Distress flagged within minutes of the call ending, via Claude analysis.

**The innovation isn't just the AI.
It's putting the AI on the end of a phone call to people who need it most.**

Tech Stack

5 technologies. 1 seamless pipeline. Built in hours.

APScheduler

Schedules & triggers daily calls per resident

Twilio

Places the outbound phone call to elderly user

ElevenLabs

Conversational AI voice agent (Aria voice, Turbo v2.5 model)

Claude

Analyzes every transcript — mood, urgency, loneliness detection

Supabase

Stores residents, calls, flags & summaries

Next.js Dashboard

Caseworker sees live call status, transcripts, mood scores, alerts

Backend: Python · FastAPI

Frontend: Next.js · Tailwind

DB: Supabase Postgres

Impact & Scalability

1 caseworker

can now oversee
500+ residents
instead of 50

500+ residents

called daily
with zero manual
effort

<5 minutes

to flag a crisis
and alert
the right person

Impact

TODAY (Manual)

Caseworker calls 8-10 people/day

Problems surface in weekly review

Emergency takes hours to reach

High burnout in care workers

WITH CALMIE

AI calls 500+/day

Distress flagged same day

SMS to family in 60 seconds

Workers focus on real crises only

Scalability

Phase 1 Hackathon

Working demo,
5 test residents

Phase 2 Pilot

Partner with 1 NGO /
social welfare office

Phase 3 Scale

Multi-language support
(ElevenLabs 70+ languages)
Any elder, anywhere, in their native tongue

Loneliness kills as many people per year as smoking 15 cigarettes a day.

Calmie is the call that could save a life today.

From Idea To Impact

01

Insight

WHO data on elderly loneliness kills **100/hour** → we can fix this with a phone call.

02

Build

FastAPI backend + **ElevenLabs** agent + **Twilio** phone + **Claude** analysis + **Next.js** dashboard.

03

Demo

Live outbound call on stage. Judges hear **Calmie's voice** live.

04

Deploy

Partner with social welfare orgs. **Scale to every city.**

**“The world forgot to call.
We didn’t.”**

Calmie — AI that calls the people no one else has time to call.
